For Use with Laptops, MP3 Players and Smartphones

Extendable Sound Performance

You no longer have to compromise performance in your portable audio experience. The Diamond Mini Rockers are a pocket sized power house with a patented retractable cable system so you don't have to worry about carrying extra pieces or cords getting tangled during transport. These portable mini speakers magnetically fasten together and are only 2"x4" when connected, making it the perfect size for quality sound on the go.

Each speaker twists open to expand for extra resonant bass. The MSP100s lithium batteries are fully rechargeable through the included USB Y-cable or your MP3 player's AC adapter. (AC adapter not included) One charge provides six to eight hours of playing time. Perfect for MP3 players, smartphones, portable CD players, netbooks, laptops, and desktop computers, the Diamond Mini Power speakers come equipped with a standard 3.5mm headphone port for easy plug and play.
